| 01             | English            | The course was run in a face-to-face mode.                              |
| 01 Enhancement |                    |   |
|                | Course (F.6)       | The F.6 group was conducted on Saturdays and the teaching               |
|                |                    | effectiveness was satisfactory. It was due to the fact that the tutor   |
|                | Ms. Ng Pui Yee     | (Ms Wong Yin Shan Kristina) was familiar with the standard of our       |
|                | ivis. Ng 1 til 1cc | students and the materials could cater to their needs. The tutor was    |
|                |                    | enthusiastic and helpful.   |
|                |                    | There were all together 10 lessons run on Saturdays and the             |
|                |                    | attendance rate was high. More than 90% of the students attended        |
|                |                    | the course and their feedback was positive. Those who were absent       |
|                |                    | would be followed and therefore, the attitude of the students was       |
|                |                    | more serious. Besides, students took part in this course voluntarily    |
|                |                    | and their motivation was high. The tutor commented that the             |
|                |                    | students were more attentive than the previous years and in general     |
|                |                    | were more diligent in handing in homework on time.                      |
|                |                    | Half of the course covered Paper 2 and the other half was on Paper 3    |
|                |                    | Part B Integrated Skills. The course ran well in the first half but     |
|                |                    | students found it harder to handle Paper 3 Part B since listening       |
|                |                    | components were involved. This part would be maintained as the          |
|                |                    | weighting of the paper was heavy. It is worth spending more time on it. |
|                |                    | As a whole, the course was effective to help students build a           |
|                |                    | stronger foundation. The tutor has taught the course for a few years    |
|                |                    | and every year, she refined the materials so that they were more        |
|                |                    | suitable for the students.  |
| 02             | English in Drama   | The program was successful. F.4 students were the target group and      |
|                |                    | the play was 'Robin Hood'.  |
|                | Ms.Ng Pui Yee      | The targets were met as it helped arouse students' interest and         |
|                |                    | motivation to learn English through live theatre performances.          |
|                |                    | movimion to fear in English enrough nite theatre performances.          |

It also inspired students and teachers to view English as FUN.

The MCs for the show also further boosted the students' confidence in their English abilities. Lastly, it also allowed more chances for students to get in touch with English through pre-activity worksheets.

The drama received positive feedback from both the students and the teachers. The story was not very familiar with the students. However, the actors and actresses were professional and it was very attractive. The time was well spent and the discipline was good. There were both students and teachers involved in the acting and they all benefited from it. The setting and the costumes were appealing.

The question-and-answer session was useful in a sense that the actors and the audience had exchanges of dialogues which made the atmosphere lively and briskly. The pre-worksheets were useful and teachers could tailor-make the worksheets which were suitable to the level of the students. Both teachers and students found the drama interesting.

As a whole, the program was successful and it is suggested that it can be run every year. The story would be up to the choice of teachers.
